

FEED OUR WORLD

2021 FOOD PARCEL DISTRIBUTION

PROJECT OVERVIEW

WHAT WE DID

Distributions were completed in collaboration with local partners. We worked to mitigate the economic situations of families and their children through the provision of both food packs and hot meals. We identified who met beneficiary selection criteria to provide malnourished children, women, men with nutritious food. The selection of food items was based on joint planning and discussion with the relevant stakeholders such as local residents and community leaders to ensure that the items reflected the most urgent needs of beneficiaries.

An estimated 2 million children in Nigeria suffer from severe acute malnutrition (SAM). That's why this project aims to address the issue of poor nutrition amongst students by making fruit trees and vegetable gardens accessible right on the school grounds! Students across five different schools are benefiting from the Nigeria School Orchards project.
